TRAINING SCENARIO

VRTS TRAINING SCENARIO RAPID RUNAWAY REPAIR

This software are equipped with very high specifications, featuring coordinative works for Rapid Runaway Repair (Triple-R) simulation scenarios using 3D environment of airports.

FEATURES

VRTS TRAINING SCENARIO RAPID RUNWAY REPAIR

Simulating joint work between heavy equipment by using the simulator together

Simulators are connected to each other via a data network.

Capable of using a VR Goggles device

Simulating the Operations of the Rapid Runway Repair Process

Using the airport practice area

Can be used to train work coordination between heavy equipment operators.

Display in an interactive, 3-D coordinated form.

Equipped with a 3-dimensional work environment model for the process of implementing the Rapid Runway Repair scenario

Equipped with a 3-dimensional model of the environment or work environment for the process of implementing the Rapid Runway Repair scenario

FEATURES

VRTS TRAINING SCENARIO RAPID RUNAWAY REPAIR

Simulating the work of various heavy equipment in Rapid Runaway Repair operations as follows:

Excavator With Breaker Attachment

Wheel Loader

Dump Truck

Truck Trailer

Compactor

Bulldozer

Vacuum Sweeper

Marking Machine

Motor Grader

Skid Steer Loader with Wheel Trencher Attachment
