OMNI TACTICAL ARMY

TACTICAL
FLOOR GAME
ELEVATING ENGINEERING OPERATIONS

TACTICAL
FLOOR GAME

Experience the cutting-edge capabilities of the OMNI Tactical Army application, meticulously designed for the Army Corps of Engineers. Unleash a new era in military operations with three seamlessly integrated modules that enhance planning, execution, and training.

ASSET MANAGER MODULE - Army Corps of Engineers

Efficiently manage Alutsista data within the Engineering Branch, seamlessly connecting to Tactical Floor Game (TFG) simulations for enhanced operational readiness. This module integrates data into Unit Plotting and TFG Unit processes, ensuring a unified approach to Engineering missions.

PLOTTING SYSTEM MODULE- Army Corps of Engineers

Empower your unit's operational precision with our advanced Plotting System. Seamlessly handle the plotting of Engineering unit movements and visualize tactical arrows for a comprehensive view, ensuring accuracy in operational planning during Engineering missions.

TACTICAL GAME SYSTEM MODULE - Army Corps of Engineers

Elevate training and simulation with the Tactical Game System. Simulate plotted scenarios for Engineering operations, serving as a vital training tool for Tactical Floor Games (TFG). Effortlessly customize scenarios and access baseline data to streamline scenario planning for Engineering missions.

KEY FEATURES

Streamlined Defense Equipment Data Management

Precision Unit Plotting for Engineering Operations

Dynamic Tactical Floor Game Simulations

Scenario Customization and Planning Tools
