

# SIMULATION INSTRUCTOR ACTION SYSTEM

Omni Global Technologies

## SUMMARY

The system provides the assessor with information about the course of the actors' simulation. There are basic parameters and data that this system is equipped with so that an assessment can be conducted.

## FEATURES / FUNCTION

Perform an analysis of the course of the simulation carried out by the actors and perform an assessment of the performance of the actors

Ensure those command units coordinate their training with one another

Prepared with the basic data necessary to plan scenarios based on that data
