This backend module is a content management system that is used to upload news, cast news, sort and manage the news published in the news of Public Info, Troops Info, and International Info.

Connected in a unified database for analysis and further processing

Media center mobile apps cater Media Relations activities are to provide information through all mass communication means to audiences. Commanders and staffs, through their PAOs, should be prepared to, for example: respond to media inquiries; issue statements; conduct briefings and interviews; arrange for access to permanent and operational units; and distribute information including imagery, all as a means to develop relations with the purveyors and the consumers of news.
